ELSEVIER

Int. J. Production Economics 51 (1997) 267–268

international journal of
production
economics

Contents Volume 51

Vol. 51, Nos. 1, 2

Innovation paths in product development: An empirical research
M. Calderini and M. Cantamessa 1
Planning of multi-site production – an object-oriented model
H.-J. Bullinger, K.-P. Faehnrich and H.-P. Laubscher 19
Optimal flow control of flexible manufacturing systems: Setup localization by an iterative procedure
K. Kogan, E. Khmelnitsky, A. Shtub and O. Maimon 37
Team-oriented assembly system design: A new approach
J. Bukchin, E. Darel and J. Rubinovitz 47
Integrating corporate learning with project management
K. Ayas 59
The metered inventory routing problem, an integrative heuristic algorithm
Y.T. Herer and R. Levy 69
Operations management of multiple machine automatic warehousing systems
M. Eden-Chaime and N. Pliskin 83
Design of a simulation library for CIM
M.A. Pollatschek 99
Real-time operational control of an FMS with full routing flexibility
M.D. Byrne and P. Chutima 109
A parallel genetic-neuro scheduler for job-shop scheduling problems
H.C. Lee and C.H. Dagli 115
Analytical approach of determining job division in manual assembly systems
G. Zülch, W.J. Braun and E.F. Schiller 123
Design and testing of piezoelectric actuator-controlled boring bar for active compensation of cutting force induced errors
W.M. Chiu and K.W. Chan 135
Investigation of chip formation during milling
P. Kovac and L. Sidjanin 149

Vol. 51, No. 3

Manufacturing blocking discipline: A multi-criterion approach for buffer allocations
A.A. Andijani and M. Anwarul 155
Scheduling families of jobs with setup times
M.M. Liaee and H. Emmons 165
A heuristic for solving mixed-model line balancing problems with stochastic task durations and parallel stations
P.R. McMullen and G.V. Frazier 177
Delivery capability and firm performance in international operations
S.E. Fawcett, R. Calantone and S.R. Smith 191
Simulation analysis of a pull–push system for an electronic assembly line
M. Savsar 205

0925-5273/97/$17.00 Copyright © 1997 Elsevier Science B.V. All rights reserved

An algorithm to determine the EOQ for deteriorating items with shortage and a linear trend in demand
K.-J. Chung and S.-F. Tsai 215
Setting preventive maintenance schedules when data are sparse
D.F. Percy, K.A.H. Kobbacy and B. Fawzi 223
Schedule based production
C.-H. Yeh 235
Planning of fuel coal imports using a mixed integer programming method
L.-H. Shih 243
Evolution of a decision support system for human resource planning in a petroleum company
R.P. Mohanty and S.G. Deshmukh 251
Erratum: "Stochastic properties of a production–inventory process with planned production using transform methodology" [Int. J. Production Economics 45 (1996) 407–419]
R.W. Grubbström 263
Diary of Events 264
